DETAILED ACTION

Election/Restrictions

Claims 1-10 and 12-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/4/2005.

Applicant's election with traverse of the invention elected in the reply filed on 3/4/2005 is acknowledged. The traversal is on the ground(s) that claims 1-11 are generic to all species. This is not found persuasive because claim 1 recites "at least one groove includes an opening and a base each having a predetermined width, said pre-determined width of said opening being generally less than said predetermined width of said base"; however, the elected species, Group 1, Figure 1, fails to meet this limitation. Therefore, the claims 1-11 are not generic to all species.

The requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

The information disclosure statement (IDS) filed 12/31/2003 is being considered by the examiner.

Priority

No priority claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by US patent 4671542, Juchnowski.

In regards to claim 11, Juchnowski discloses an assembly comprising:

a first member (50) having an inner surface;

a second member (12) having an outer surface and being at least partially received within the first member;

at least one of the surfaces including at least one groove (14) for receiving a portion of the other member; and

wherein one of the first and second members has greater rigidity, and the groove is associated with the member with the greater rigidity.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it illustrates the inventive concept of the invention.
